SKILLS

- Coding agent orchestration
- CLI & MCP development
- Electron & React Native
- React & Typscript
- NextJS
- Node & Deno
- Postgres & SQL
- GraphQL
- Python
- Twilio & Slack
- Stripe
- Smart Contracts
- Supabase & Railway

EDUCATION

Le Wagon

Date Science, Machine Learning & AI
11 weeks, full-time, 2023

Flatiron School

Software Engineering Immersive,
15 weeks, full-time, 2019

Dickinson College

Bachelor's of International Business & Management, Honors: Cum Laude

LANGUAGES

English

German

Arabic

I'm a founder and full-stack product engineer with more than a decade of experience in engineering and product strategy. I now work at the frontier of agentic coding infrastructure. I built and launched Overlord, a coordination layer for AI coding agents, and have shipped products across finance, healthcare, and brick-and-mortar operations. As a former founder, I gravitate toward roles that pair technical depth with product ownership, where I manage both architecture and user experience.

ACHIEVEMENTS

- Built and launched Overlord, an agent management tool that lets single developers manage 5-7 concurrent workstreams at one time (ovld.ai).
- Building an AI-first tenant-management platform that gives landlords a digital secretary and a unified communication channel (Twilio, Stripe).
- Built and launched a staff and task management platform for a chain of brick & mortar businesses in the San Francisco area.
- Built and launched a compliant platform for issuing private securities on Ethereum architected for offerings between $10mn and $25mn
- Led a team of 5 to design and prototype a medical billing platform that won an honorable mention from a U.S. Department of Health and Human Services competition.
- Led a reorganization of EveryBill's software development process, doubling production speed – one senior engineer described it as **"a game changer"**

EXPERIENCE

Cooperativ Labs Inc., Founder & Full Stack Engineer

Berlin, Germany | February 2021 - Present

- Founded and run a product-engineering studio building software end-to-end for clients and as in-house tools.
- Own the full lifecycle: architecture, full-stack build, smart-contract design, and regulatory compliance.
- Scope and ship products with clients from concept to launch, coordinating external contractors as needed.

Artory GmbH, Product Strategist & Junior Software Engineer

Berlin, Germany | July 2019 - August 2021

- Built the go-to-market strategy and pricing models for a multi-sided marketplace product.
- Ran customer-discovery interviews and translated findings into UI for products in development.

EveryBill LLC, Director Product Development

Providence, RI, United States | August 2014 - October 2018

- Directed custom-development projects for the largest enterprise customers.
- Led design of a healthcare payment platform (the HHS-recognized build above).
- Drafted and lobbied for state legislation enabling electronic billing — a rare cross of product, policy, and stakeholder work.
